

BARRACUDA PLIERS

DESIGN fishpond engineered these from the ground-up to create a lightweight and durable fishing pliers that would transcend all competition. Made from machined, aerospace-grade aluminum with precision stainless steel gripping jaws and cutting blades.

FEATURES

- Machined aerospace grade aluminum
- Replaceable stainless steel jaws
- Replaceable stainless steel cutters
- Spring loaded
- Carrying sheath and lanyard included (Imported)
- Weight approx. 5 oz.

Note: Stainless steel jaws and cutters will rust in saltwater, so treatment with a rust inhibitor before use is essential. Don't forget to rinse and treat again after use. The jaws and cutter screws use a 3/32" Allen wrench and the set screw uses a 1/8" Allen wrench.

DIMENSIONS 7.25"

- ITEM # - COLORS**
- BP-CO (Cutthroat Orange)
 - BP-G (Gunmetal)
 - BP-AB (Aqua Blue)
 - BP-L (Lichen)
 - BP-RCB (Replaceable Cutting Blades)
 - BP-RJ (Replaceable Steel Jaws)
- Made in USA

PITCHFORK ALUMINUM CLIPPERS

DESIGN Breaking the traditional mold, we wanted to radically change the design of probably the most often-used tool in fishing. The result is a patented product that's become the most performance-driven clipper on the market.

FEATURES

- Aerospace grade, tubular aluminum body
- Stainless steel blades
- Precision aligned, razor-sharp cutting edges
- Patented, ergonomic design

Note: Stainless steel blades will rust in saltwater, so treatment with a rust inhibitor and lubricant before use is essential. Don't forget to rinse and treat again after use.

DIMENSIONS 2.75" x .5" dia.
