

FIREHOLE TIPPET/LEADER GAGE

DESIGN Measures up. If you build or repair your own leaders, our Firehole Tippet/Leader Gage is sure to become one of your most indispensable accessories. Machined from aerospace aluminum, this unique tool measures tippet material and monofilament line from 8X (.004) all the way up to .031 with pinpoint accuracy. It also incorporates a hook eye clean-out pin.

FEATURES

- Precision machined from durable aluminum stock
- Easy-to-read tippet measuring system provides accurate identification of tippet/leader size
- Two-tone anodized body available in assorted colors
- Built-in hook eye clean-out pin
- Retractor/lanyard attachment hole
- Measures from 8X (.004) to .031

DIMENSIONS 2.25" x 2"

ITEM # - COLOR FTG-AC (6-Pack, Assorted Colors)
Made in USA

SWIFT CURRENT THERMOMETER

DESIGN A cool idea. Fluctuations in water flows across the country and resulting changes in water temperature have a dramatic effect on insect hatches and feeding patterns. As a result, a thermometer can mean the difference between catching fish or catching nothing at all. Our laboratory-grade thermometer provides accurate water temperature readings under a variety of salt and freshwater fishing conditions. Measures water from 20 to 120 degrees Fahrenheit. Also available in Celsius.

FEATURES

- Rugged aluminum case helps protect thermometer from breakage
- Retractor/lanyard attachment cap helps prevent accidental loss
- Easy-to-read temperature scale
- Available assorted anodized colors

DIMENSIONS 4.625" x .5"

ITEM # - COLOR SCT/F-AC (6-Pack, Assorted Colors)
